Oral health is an essential component of health throughout life. Poor oral health and untreated oral diseases and conditions can have a significant impact on quality of life. For these reasons, the Kerala State IDA has taken several initiatives aimed at improving oral and general health. It is our hope that this trend will not only continue but, will increase and extend to other development oriented endeavors as well and that is why the IDA is joining hands with the Lions Club, the world's largest Service organization, for the effective implementation of their service program.

Kerala State IDA together with Kochi IDA branch and Lions Club of Cochin East organizes inauguration of the annual "World Oral Health Day" on Sunday Sept.11 2011. The purpose of this day is to increase global awareness for oral health, as well as the impact of oral diseases on general health and well-being.

The date marks the anniversary of the FDI World Dental Federation.

Each and every one of us as dentists and citizens, as professional associations and public health advocates, are able to contribute to better oral health world wide. Let us on this World Oral Health Day join together to recognize that oral health is a vital part of well being for all, celebrate the progress we have made to date, and at the same time commit ourselves to continue working towards better oral health for all made to date, and at the same time commit ourselves to continue working towards better oral health for all.

We do very much hope that you will be able to accept this
