PFA – IDA

CONTINUING DENTAL EDUCATION PROGRAMME 2019

IMA HOUSE KOCHI, DECEMBER 7TH AND 8TH 2019

This December, Pierre Fauchard Academy (PFA) and Indian Dental Association Kerala state are jointly hosting a 2 day Mega CDE program alongside the PFA annual conference at IMA house Kochi. The Pierre Fauchard Academy is a volunteer-run, non-profit dental organization that was founded by Elmer S. Best, a dentist from Minnesota in 1936 with the objective of independence from commercial interests in dental research and publications. IDA and PFA are two dental organizations committed to improve the standards of fellow dental practitioners by way of imparting quality education. It is with this aim that two great organizations are joining hands to organize this Mega CDE program. This 2 day event will show case the best of speakers from across the country deliberating on the most wanted topics of interest to a general dental practitioner.

Limited 300 seats only

Aim of the talk is to discuss the various diagnostic, prognostic and treatment modalities of different periodontal conditions which are seen in day to day practice. The interdisciplinary approach with endodontic, orthodontic and prosthodontic along with periodontal treatment will be highlighted.

Speakers

Dr George Jacob

Biomimetic Esthetic Dentistry - The Nature's Choice

Terminologies "Conservative Dentistry" and "Minimally Invasive Dentistry" were just a fashion statement in yesteryears. Today it's a reality with the help of magnification, precision in impressions, digital scans combined with lab techniques, the newer bonding philosophies, the treatment modalities considered impossible before are easily materialized in our day to day practice. This lecture throws light into the endless possibilities of Biomimetic Esthetic Dentistry in our workplace providing a better option to the clinician and the patient.

Dr Giju George Baby

3D: Deciphering Diagnostic Dilemmas

The contemporary but comprehensive knowledge regarding CBCT and its proper application, guides the practitioner in improving diagnostic purposes and treatment planning. It has been observed that the exposure from CBCT is within the same range as traditional dental imaging and moreover, a complete series of traditional dental radiographs has a higher radiation dose than CBCT, hence justifying the ALADA principle. There is strong evidence to suggest that CBCT imaging could replace conventional 2D imaging. It should be balanced with the perspective that most CBCT studies are easier to perform in a dental office when compared with a full-mouth series of radiographs, or perhaps even a panoramic radiograph with bitewings and selected periapical images. This presentation focuses on the various applications of CBCT in dentistry.

Dr Sunil Mohammed

ABCD Of NOIS (Nitrous Oxide Inhalation Sedation)

Many avoid dental treatment due to needle phobia. Anxiolysis, mild analgesic effect and amnesia are companion of Nitrous Oxide. This safe gas much needed for dentistry than medical profession, has a safe track record since ages. Lets happily discuss and learn more about laughing gas!!!

Dr Anuj Bharadwaj

3D Endodontics - The Cutting Edge

The success of endodontic therapy lies in the efficiency with which microbial elimination is done from the three dimensional root canal system. Now with the new adaptive instruments that touch more canal surface area, this motive is achieved meticulously, while leaving a thicker and stronger roots for better function. These instruments are easy to use and are cost effective since one instrument can adapt to more than one canal shape and save a significant amount of time. This Presentation will cover the advantages of adaptive Instruments over the conventional round shaped files in bringing about the best endodontic treatment outcome.

Dr Nikhil Marwah

Small Steps To Big Success – Secrets Of Clinical Pediatric Dentistry

Any successful Dental practice is incomplete without minor surgical procedures. Mastering the art of trouble free minor surgical practice demands an experienced flawless technical skill backed up with sound knowledge about the Do's & Dont's and Pros and Cons. Performing these procedures the right way is the key to success.
